TIME SAVING
RECORD
SYSTEMS

to

ACME VISIBLE offers you coordinated long-range record systems covering pupils, personnel, property, and any other administrative responsibility from kindergarten through college. All types of records are designed especially to fill your needs.

to give	$\left\{ \begin{array}{l} \text{maximum convenience for use} \\ \text{maximum information for reference} \\ \text{maximum flexibility for expansion} \end{array} \right.$	to require	$\left\{ \begin{array}{l} \text{minimum time for posting} \\ \text{minimum space for storing} \\ \text{minimum expenditure on a long-range basis} \end{array} \right.$
------------	---	---------------	--

This bulletin illustrates some of the hundreds of ACME VISIBLE forms that schools nation-wide are using. Let us show you how our records can expedite your specific operations.

ACME **VISIBLE**

OPEN FRAME EQUIPMENT

**ALL THE FACTS
VISIBLE
AT THE FLICK OF A FINGER**

Whether you have only a few hundred records used by one person or many thousands of records which must be available to many persons . . . if you want the records on a desk, on a movable table, or on the wall . . . if you have plenty of space or must conserve space, Open Frame Visible Records will save you time and money.

In the Acme line there is a wide variety of open frames and stands that permits various arrangements to meet every individual record requirement.

[illegible]

WIDE CHOICE OF SIZES

Open Frames are available 11", 15", 20", and 24" high; for cards 5", 6", 8", 10", or 11" wide. One-sided frames with one-half capacity are supplied where it is desirable to use the record on a desk or flat on the wall.

With Open Frames you may use pocket cards from 5 x 3" to 11 x 8" and hinged cards from 4 x 2" to 13 x 6". This wide choice of sizes permits you to use record forms of the exact size to meet your individual requirement. Forms may be printed on one or both sides.

SIGNALLING. Acme transparent signals and progressive signals for pocket records and metal signals for card records are used for greater visual control to show changing conditions and spotlight important facts.

POCKET RACKS ■

For records that are short lived and constantly changing. Designed to allow sufficient exposure at the top of each pocket to visualize indexing of contents. Several cards or papers pertaining to one subject may be kept together in one pocket.

← SUPER-VISIBLE FRAMES

Rigidly constructed with permanently affixed runways on both sides, bottom channel of frames are open sufficiently to allow bottom last cards to nest into them.

The margin information, one, two or more lines, is at the top of the cards. May be indexed on typewriter or from addressograph plates. Precision Super-Visible die-cut makes it easy to snap cards on to the runways, and assure accurate alignment of indexing. They nest together with only the visible margin exposed and slide easily to allow posting if required, and to permit expansion, shifting or transferring of the records.

FOR I.B.M. TABULATING CARDS

Electric accounting machine card records are made more valuable and useable through the advantages offered in visible filing. Tab cards with an interrupted Super-Visible die-cut can be run through an interpreter and the selected information printed on the top margin. After being run the interrupted die-cuts are snapped out and cards are mounted on the runways of the frame ready for reference. S.V. die-cuts may also be applied after cards are run.

← HOLDER CARDS

Visualize existing "blind" record cards, loose inserts or similar material, merely by placing them behind properly indexed Super-Visible Holder Cards. These cards are supplied with cut-out in the top edge or with diagonal corner cuts which make it easy to remove insert material and serve as automatic "out" signal when insert is removed from file.

SUPER-VISIBLE CARDS

A complete range of card sizes from a 3 3/4 x 1" for purely reference or cross-indexing up to 8 x 6" for active posting records. Cards may be printed on one or both sides and may also be supplied in continuous forms. The Super-Visible die-cuts assure accurate alignment and uniform visible margins.

Acme stands for Open Frames are made in numerous styles to fit individual record needs. All frames are held in vertically aligned holes, spring tops permit easy insertion or removal of any frame.

OBLIQUE STANDS

OBLIQUE STANDS

For use on desks or tables, oblique stands are supplied for 4, 9, or 11 frames. Any number of units may be joined together for large installations. Frames stay open without being held.

REVOLVING STANDS

Recommended where compactness and great capacity are essential. Frames are held in fixed position, swing open easily for reference and entire stand revolves smoothly to make any desired frame quickly available. Sizes to hold as few as 9 or as many as 50 frames.

REVOLVING STANDS

WALL BRACKETS

To utilize wall space Acme Wall Brackets are made in various sizes to accommodate any number of frames. They are supplied complete ready to be attached to the wall.

BOOKKEEPER STANDS

Hold the frames in natural position for writing. Ideal for entry records, frames turn as leaves of a book. Sizes for 9 or 11 frames, units may be joined together for use on desk or built as an integral unit on Acme Mercantile table.

WALL BRACKETS

BOOKKEEPER STANDS

TABLES AND PEDESTALS

Mercantile tables may be supplied joined as an integral unit with Bookkeeper stand or separately for any other use. Pedestals are designed for holding revolving stands. Tubular construction with braced joints provide great strength. Equipped with dome glides or rubber tired casters.

PLANNING PANELS

for

PROGRESS REPORTS • MACHINE LOADING • PRODUCTION SCHEDULING
PERSONNEL ALLOCATION • MAJOR ASSEMBLY AND COMPONENT PARTS CONTROL
ORDER SCHEDULING • SALES AND PRODUCTION QUOTA RECORDS and MANY MORE

ACME VISIBLE

As a visible machine loading system, Acme Visible Planning Panels provide the flexibility demanded by constant changes in shop loads, for any cause, by graphically scheduling machine operations or work centers.

- A pocket is set up for each machine or work center on which it is desired to build up the load or scheduled hours of work for that machine or work center.
- A card placed at left of the pocket contains description of machine or groups of machines exactly alike (i.e., three or four shapers, lathes, etc.) any one of which can do the work involved.
- A title insert is placed in the acetate tip of the pocket. Insert is printed with calibrations of hours from 0 to 55 (or as many or few as required). Each hour is further graduated in units of $1/5$ of one hour each.
- Load cards of different colors are printed with calibrations indicated in the title insert. When cut to the size of the hours required for each job and placed in the pocket, the bottom edge of this card visibly indicates the number of hours scheduled and the number of hours still available for that machine or work center.

Panels may be set up for a week's schedule or for any period to fit the volume of scheduled operations and the machine load requirements.

A Load Card is typed or written for *each operation* to be scheduled. Form is printed to contain complete information, and is made in lengths up to 14 hours. For less time card is cut to required time. For greater length of time, two cards are stapled together and then cut to size.

280	MILLER	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16	17

Even greater VISUAL CONTROL is accomplished through the use of signals. There are many styles of Acme signals . . . all in brilliant colors . . . which bring important facts to attention at the proper time for necessary action.

Progressive signals are adjusted forward or backward to portray varying conditions VISIBLY and PROGRESSIVELY *as they occur*. Rectangular signals are used to point up significant facts . . . to show jobs behind schedule, due dates, or anything else that requires special attention.

Lock-in chain signals are a series of transparent acetate colored flags, assembled into a single unit that is locked into the Acme pocket. Signals are always ready for use; flag slides down to be seen in the visible margin; when situation is resolved, you simply slide it up and it is out of sight.

Acme Planning Panels are designed for mounting on wall; easel stands, posting shelves and other types of suspension are also available. Supplied in 3 sizes:

- with 100—30" wide pockets—dimensions 30½" wide, 32" high
- with 100—18" wide pockets—dimensions 37½" wide, 19½" high
(2 rows of 50)
- with 25—30" wide pockets—dimensions 30½" wide, 13⅞" high

Panels may be used singly or side by side. Their construction, and the suspension of pockets practically flush to both sides, permits unlimited horizontal visibility.

ACME

VISIBLE

PLANNING PANELS

To provide management a graphic story of any phase of operations, Acme Planning Panels are ideal for:

- Machine Loading
 - Progress Reports
 - Production Scheduling
 - Personnel Allocations
 - Major Assembly and Component Parts Control
 - Order Scheduling
 - Sales and Production Quota Records
- and for many other applications

Progressive, Lock-in Chain and Transparent signals tell the story simply and quickly on the visible margin. Cards and title inserts contained in the pockets permit recording of pertinent details, showing history or background of the results signalled on the visible edge.

Planning Panels embody the features of the Acme Visible Hinged Pocket Record Systems enlarged to display boards.

Pockets 18" or 30" wide and 4" high are made of tough Kraft stock with cellulose acetate transparent edge firmly attached. Die-cuts permit use of cards of various lengths. Visible indexed cards, title inserts and signals are inserted behind the protecting edge and held firmly in place.

Steel hinges are permanently attached to the pockets. When slipped on the prongs of spring steel hangers they provide a secure light-acting pivot on which the pocket turns back, with perfect alignment and unvarying exposure of the visible margin. Pockets are easily and quickly removed for shifting position within the panel to provide for new items, etc.

Scheduling Center—Air Line

Available Time Schedule—Radio Station

This example shows a "Job Loading" panel as used by a large rug and carpet manufacturer. Card at left, indexed "Machine #" carries description, capacity and all other pertinent data. Title insert is printed to show hourly

scale. Individual job cards have lower edge printed in various colors to show type of product. Colors act as signals and cards are cut to show time required for each job, special instructions are typed on cards.

An excellent application of the use of Lock-in Chain signals in this illustration of an Acme Planning Panel used by a large model agency. Card indexed with name contains all the facts, talent, address and phone number, etc., of

the model. Title insert is printed to show days and hours; different color signals indicate day of week and signal flags moved down show hours individual is scheduled. Flag up shows time available.

PRINTED RECORD FORMS

To be completely effective, a record must bring out the information needed quickly and economically. The Acme Systems Department is expert in designing such forms, always keeping both methods and forms simple and direct. Size, subject matter, printing and ruling varies to meet individual record requirements. A few of the many forms Acme has supplied are illustrated. Many more are in stock and Acme will produce special forms to fit your records.
